

K-LOVE radio network serves my area via translators, and is one of the few radio stations safe for my family to listen to. Their positive message, news, information and coverage of issues that my wife and I face make K-LOVE a vital part of our community. Even the remote possibility of K-LOVE being displaced by an LPFM is disheartening. We support K-LOVE financially, love doing so, and would like to respectfully petition the FCC to not interfere with our ability to receive KLOVE in our area. The signal strengths are the greatest - but the benefits to us as a family and the positive impact K-LOVE has on our community are well worth the inconvenience - especially in these times. Thanks for your consideration today. Sincerely

Frank & Jan Scales
